

Creating a group stimulation preschoolers' programme focused on Romany children has been the main aim of this paper. The programme shall focus on stimulation partial components of speech and other speech related areas.

Theoretical part of the paper focuses on the area of culture, upbringing and language of Romas. Further on it focuses on the area of education of Romany children, their specifics and reason for school failures in local school system. The theoretical part of my paper also covers the area of logopedical care in Romany children.

Practical part describes a group stimulation preschoolers' programme. It is a speech centred programme. In the latter parts data collected in the programme are compared and final data analysis is performed. Forming the above mentioned programme is the final outcome of the diploma paper.
