### Title:

#### **Contractual copyright**

The thesis describes the czech contractual copyright. The thesis is composed of six chapters. Chapter One is just introduction, charter Two describes the czech legislation of copyright and its internationally and europien legislation.

Chapter Tree is about copyright and its devolepment in the Czech Republic, after that defines the Concept of the copyright, and the basic concepts of Czech copyright act, that is Authorships, work, use rights. The author, according to the Czech copyright, could be only a natural person, who created the work. The work is literary, scientific and other art, that was make by the author's creativity and is expressed in any perceptible form.

Use rights is a property law in work, which leads to its valorization. The property law is devided in two: use rights and the property other rights. Use rights could for example: reproducing, loan, exposure.

Chapter Four describes the Czech contractual copyright under Czech law. Czech copyright act has tree contractual type: license agreement, sublicense agreement and the publishing agreement. The main contractual type is the license agreement, the next subchapters describing the basic concepts needed for a goog and right contract. You can find the answer who are the subjects of contract, how should look the form of the contract, what are the rights and obligations of contractors, what is repayment and the ways of withdrawing from the contract.

Charter five is about the other contractual type, that the author can use to share his work and is divided in two parts. One focuses on contract for work and part Two deals with license Creative Commons.

License CC are a new version of contracting, that works alongside with copyright. They are addressed to whom, who likes to share his work by the world website. You can find there the basic information about the types CC, applications CC and rights and duties.
