ments and questions to answer:
oretical part is written with very good knowledge obtained during bachelor study. Some parts show student's
vork in depth with literature, however their trasforming to chapters is not arrange in easy order. Student

ed special attention to bone and surronding tissues healing processes and again the logical consecutionto a text synoptic. The practical part reflects students ability react to changes in subjective stage of patient, it is writtent ails. Question: How can more difficult cooperation with patient and his premature loading affect stage after ire? And how may student (physiotherapist) approach affect such patient's behavior?
comendation for defence:	YES	
signed classificatory degree	excellent
