

Abstract

Title of the Thesis: Competency Profile of Outdoor Instructor

Target: The goal of this diploma thesis is to create a competency profile of the instructor of outdoor courses aimed at the education and development of their participants.

Methods: To achieve the goals the following two methods were used. On one hand the complex picture about work of the instructors was established by observing them at work. The second method was a personal questioning of the instructors, which was key in gathering of detailed information about their required competencies.

Result: The result of my research is a comprehensive set of individual competencies of an outdoor instructor including their detailed description.

Key words: experiential education, outdoor training, teambuilding, teamwork, outdoor instructor, feedback, competency profile, 360 degree feedback review.
