Title

Project of Educational cycle trail in the protected landscape area in Czech Central Mountains.

Objective

The aim of this work is to create a project of two Educational cycle trails in the PLA Czech Central Mountains and its subsequent processing into the paper form (information brochures), which could be offered in Tourist Information Centres.

Method

Data analysis of the region in connection to cognitive goals. Analysis of existing bicycle trails, bicycle tracks and Educational cycle trails. Based on the knowledge, creation of Educational cycle trails.

Results

The result of this work is a proposal of two Educational cycle trails in the protected landscape area of the Czech Central Mountains. They were processed in paper form (information brochures), so that they can be offered in Tourist Information Centres. Along with this, the two newly formed Educational cycle trails were incorporated into the software program Cyclo 2.15. This will increase the possibility of presentation of the newly created Educational cycle trails.

Keywords

Educational cycle trails, bicycle trail, bicycle track, the Czech Central Mountains, protected landscape area, biking.
