

ABSTRACT

Title:

Comparison analysis playing skills in football tennis

Key words:

Football tennis, kinematic analysis, smash

Aim of the thesis:

The aim of my thesis is comparing the techniques of smash inside foot of players different competitions.

Conclusions:

Among the most significant mistakes the players during the test done, were crouching over swinging leg from the unfolded and the height of impact. Other mistakes can be classified playing the ball in position beside the body.

As we stated recommendations focus on removing excessive flexion at the knee of swinging leg, monitoring the height of its positive impact and influence and an emphasis on good ball played in front of him.
