

The main purpose of this bachelor thesis is to map orientation opinion on competences medical rescuers in the Czech Republic. In my empirical investigation I have realized comprehensive questionnaire searching in every current Regional Centre of Rescue Service in the Czech Republic. Partly are characterized and assessed a view and opinions from group of rescuers and doctors from Regional Centres of Rescue Service. On the basis of theoretical issue handling I have formulated 5 premises that I verified with my investigation, except one of them. Competences issue of medical rescuers in the Czech republic is taking meaning and lately is more often centre of interest of various discussions and gatherings.
