

Abstrakt

Name: The analysis of the playing performance of the line players on European Championship in Brno 2008

Object of the work: We would like to analyse playing action of the line players 2008 Men's 18 European Handball Championship in Brno, define individual action and tendency of the performance of the line players on the previous Men's 18 ECh. We define the most used individual technics and combinations on Men's 18 ECh in Brno.

Methods: We used non participating and non structured observing and qualitative analyse. Data was generated by Hand Ball Stat 1.7 for quantitative analyses and we chose the most important statistic data, which describe playing performance of the pivots on ECh in Brno.

Results: Shot efficiency of the pivots rise from the previous Men's 18 ECh. The same trends are followed also in the physical conditions and technical skills of the line players in this age.

Key words: handball, line player, analyse, youth, Brno 2008
