

Thematic atlas of beerindustry in Czech Republic

Abstract

The main intention of this thesis is to make a thematic atlas of brewery in the Czech Republic. The maquette of atlas is add as a supplement. The search part contains a brief history of Czech brewery and the present state of it, with adumbration of future development. The most important Czech brew-houses are mentioned too. The second search part introduces another thematic atlas-books on our market. The methodical part describes projecting of the atlas and making of particular maps. The last part is the discussion, presentating the main problems, which appeared during making the atlas itself.

Keywords: thematic atlas, brewering
