

Report on Bachelor / Master Thesis

Institute of Economic Studies, Faculty of Social Sciences, Charles University in Prague

Student:	Gledis Kazazi
Advisor:	Roman Horváth, Ph.D.
Title of the thesis:	Interest Rate Pass-Through: Does It Change with Financial Distress? The Czech Experience

OVERALL ASSESSMENT (provided in English, Czech, or Slovak):

The thesis tackles empirically the policy relevant issue of the changes of monetary transmission mechanism in the Czech Republic. More specifically, it is a comprehensive empirical investigation of the interest rate pass-through and its changes during the 2008-2009 global financial crisis.

Gledis work is a contribution to the policy discussions on monetary policy in the Czech Republic. The thesis is well-organized, estimations well-executed and literature appropriately cited. Actually, some parts of thesis are original contribution to this stream of literature. Researchers within this stream typically estimate the pass-through from domestic money market rates into domestic bank interest rate. Gledis approach is more general and examines the both the role of domestic as well as foreign money market rates pass-through into domestic bank interest rate. I havent seen any paper within such general setting in the literature.

Therefore, I strongly recommend the thesis for the defense and suggest grade A. I also suggest a distinction from the Dean of the Faculty of Social Sciences for an extraordinarily good MA thesis.
