The work *Man being God in the conception of Comenius* is about Comenius' view of man. The purpose of my research was to find out in his literacy his opinion of man like Image of God. This work was about man's position in front of God. What is the purpose of human being. And if man still has rights to have an image of God although we are sinners. The results of my research, that I found out Comenius' principles. The first principle is moving in relation to the centre, and the second principle is harmony. These two principles have God's creations, only when they are in relationship with Him. And also people are able to be on the Image of God when they are in relationship with Him.

Keywords

Man – Creation – God – Comenius – Whole – Being – The purpose of being – Harmony – Restitution.
