

Expert opinion of dissertation work

Dr. Sujith Sukumar, B.D.S.:

Evaluation of a composite synthetic bone substitute material Fortoss® Vital in the treatment of periodontal intrabony defects.

Generally: pages 122, chapters 9, tables 18, figures 17, references 177.

The theme of this dissertation is of interest to periodontology generally.

Dr. Sujith Sukumar is able to apply his professional knowledge to a variety of clinical situations in periodontology including treatment of alveolar bone defects.

Dr. Sujith Sukumar used acceptable methods to demonstrate the aim of study.

Dr. Sukumar completed the dissertation work requirements.

I deliver the positive reference

under the condition that following questions will be answered:

- 1)What is the personal authors experience with resorbable and non resorbable barriers.
- 2)Under what conditions is it possible to use Fortoss® Vital for treatment of one wall bone defects?
- 3)What method(s) of preparation of root surface in bone defect surgery in periodontology (mechanically, chemically and biologically) is suitable for future ?
- 4)The experience with use of xenografts.
