

Abstrakt

The diploma thesis is about the preparation, implementation and feedback of a school project. The first part is focused on the territory, regional history and its application in teaching. The following topic introduces the history of town Da ice, the most important monuments and personages of this town. The main part of the diploma thesis describes several-day project lessons carried out directly in the town and its data processing in connection with next utilization of the beginning project for the school, next classes, whole town and last but not least territory. The main task of the diploma thesis has been fulfilled. I have created the methodical manual for teachers from primary and secondary schools how to make an excursion through the town (or city).
