

ABSTRACT

Title: Achievement motivation of pupils

Author: Veronika Svobodová

Supervisor: Doc. PhDr. Isabella Pavelková, CSc.

The concern of this dissertation is the achievement motivation of pupils on the 2nd grade of primary schools.

The aim of the theoretical part is the introduction to the theme of motivation of human behaviour with an accent on specifics of motivation for learning and especially the description of achievement motivation.

In the practical part, there are set two research targets. The first target is to map achievement motivation of the pupils on the 2nd grade of one specific primary school. This mapping is done by the statistical processing of data from the questionnaire of achievement motivation MV-9, which was given to pupils. The second research target is a detailed analysis of achievement motivation of selected pupils from one class of the 2nd grade of the primary school. The aim is to identify significant demonstration of behaviour in relation to their achievement focus. Besides the filled questionnaire MV-9, the data are gathered from observations and interviews with pupils.

Keywords: motivation, school achievement motivation, school achievement
