

Téma diplomové práce	Effect of colchicine on P-glycoprotein expression and activity in caco-2 cells
Jméno studenta, studentky	Tereza Houdková
Jméno vedoucího diplomové práce	PharmDr. Jana Pourová, Ph.D.

I. Posudek vedoucího diplomové práce

Tereza Houdková vypracovala svoji diplomovou práci (dále DP) v rámci programu Erasmus na Farmaceutické fakultě Univerzity v Porto (Portugalsko) na Katedře toxikologie.

V České republice proběhlo pouze sepsání práce. Studentka si na konzultace ohledně DP ponechala kratší čas, než je obvyklé. Připomínky byly sice rozsáhlejší, nicméně studentka na všechny rychle reagovala a práci odevzdala v řádném termínu. Vzhledem k tomu, že práce byla reálně vypracována v zahraničí, níže připojuji vyjádření školitele – specialisty z Univerzity v Porto.

Renata Sofia Araújo da Silva

REQUIMTE, Toxicology Laboratory, Biological Sciences Department,

Faculty of Pharmacy, University of Porto

As regards myself, I hereby give my opinion about Tereza Houdková Erasmus program and I am privileged to write about a very dedicated and hard worker student.

Tereza was in our lab for six months, during which time I witnessed his tremendous growth and development in the laboratory. In the beginning, she was very scared about the cell culture related work because of the possibility of having cell contaminations which could delay the work, but she was able to overcome all the problems and fears in a very easy and intelligent way.

Tereza quickly learned to manage her time, work under strict deadlines, and to recognize the importance of a strong work ethic, persistence, and intellectual integrity. She has long since become a valuable member in our student-lab team. Moreover, all the hard work was completely recognized resulting in two poster communications, one in a national congress and the other in an international congress, being this last one an international congress of great prestige in the field of Toxicology.

Thus, in my opinion, Tereza had a very pleasant and compensatory stay in our lab and completely exceeded the goals required to an erasmus student.

Sincerely,

Renata Silva

Navrhovaná klasifikace **velmi dobře**
