

Abstract

The thesis on The process of implementing modern information technologies in public administration with a focus on the Police of the Czech Republic deals with the progressive modernization of the administrative processes at Police of the Czech Republic. It describes and analyzes a particular example of the implementation of new electronic system called Evidence of Criminal Proceedings. Until now used method of evidence called the Diary of a criminal case files was mainly based on the principle of keeping paper documents in each part of organization.

This thesis trying to compare the previously used system with newly introduced system and also makes reference to the various implementation models, which could be possible used during the introduction of an information system Evidence of Criminal Proceedings. The thesis presents three possible models of implementation. During the introduction, from 2003 until now, the Police of the Czech Republic used a combination of two of the three options.

Furthermore you will find a description, analysis and assessment of the advantages and disadvantages of information systems, these systems compare with each other with view the involvement of various participants, staff and financial performance, efficiency, etc.

The theoretical approach of this study is the theory of organization and bureaucracy, management theory and administrative theory. In the analytical work was mainly used correlation analysis and analysis of actors.
