

Summary

My diploma thesis was focused on evaluation of degree of success of project „Education of Humanities at BUT“ within a scope of Operational Programme Human Resources Development 2004 – 2006 implementation. I presupposed from formulation of the paradigms using theoretical concepts of public policy, education and management to practical analyses Project phases. I put the cardinal emphasis on the implementation phase, which I remeted to research. I evaluated the Project implementation as extraordinary successful on the base of outputs of expert interviews, focus group and questionnaire within a scope of the research.

I tried to compare this Project with another one, similar project settled in any other Member State of the European Union. I reached that similar projects in other Member States have not been realized, the only comparable one was Portugese Project in the programming period 1994 – 1999 focused on increasing competitiveness of students of high schools. This finding led to conclusion that the Project realized at BUT was unique and its successful realization could be considered as a leading case in the area of Structural Funds of the European Union in the Czech Republic.
