

Abstrakt (anglicky)

This bachelor's thesis processes the library collection in Castle Biskupice. The aim of this thesis consists in the provenance and content characteristics of the library collection in Castle Biskupice.

The introduction describes the present situation of the library. The second chapter deals with the library's history. The third chapter outlines the gradual creation of the library and the history of the families that had built it. In the Chapter "Provenance characteristics of the collection, an identification of books owners from the family lines of Schaffgotsch, Pálffy, Thurn-Taxis, de Linge and their genealogical relations is provided. Furthermore, this chapter characterizes the collections of particular family members. Partially, it also extends to the collection content characteristics that are provided in general in the follow-up chapter. It divides the collection into particular genres and describes interesting books and authors whose works are to be found in the castle library. The conclusion contains the thesis summary, achieved results and outcomes.
