ABSTRACT:

The aim of this bachelor's thesis was to find out how students and pupils evaluate past time activities in the boarding house at our school. After getting known the legislation of boarding houses and the characteristics of age – groups of accommodated students the survey was accomplished. Each student evaluated the past time activities in the same way they are evaluated at school (1–5). For better graphic presentation of the results the evaluation was converted into points. Final results were put into charts and diagrams. Our schoolmistresses evaluated freetime activities in the same way as students did. There were made a list of activities that students and pupils liked and it was compared with the list that mistresses set.

The conclusion was to think about these results and their using for organizing past activities in our boarding house for the next school year.
