

REPORT OF BACHELOR THESIS

Leadership´s name:

Mgr. Klára Hojková

Student´s name:

Dimitris Nikolaou

Title of diploma thesis name:

Case study of Physical Therapy approach of patient with bilateral coxarthrosis after surgical operation of total hip replacement.

Goal of thesis:

Description of theoretical and clinical experiences with patient after total hip replacement.

1. Volume:

* pages of text	117
* literature	39
* tables, graphs, appendices	tab.(32), fig.(23)

2. Seriousness of topics:

	above average	average	under average
* theroretical knowladges <i>anatomical description is long and general.</i>		x	
* input data and their processing <i>student was very concentrated for data collection during his clinical practice</i>		x	
* used methods		x	

3. Criteria of thesis classification

	stupeň hodnocení			
	excellent	very good	satisfactory	unsatisfactory
degree of aim of work fulfilment	x			
independence of student during process of thesis	x			
logical constutruction of work	x			
work with literature and citations		x		
adequacy of used methods	x			
design of work (text, graphs, tablels)	x			
stylistic level		x		

4. Usefulness of the thesis outcomes:

under average average

5. Comments and questions to answer:

1) Which muscle or muscles could be cuted during implantation of total hip replacement? And which functional changements it has for the gait pattern?

6. Recommendation for defence:

ANO	NE
-----	----

7. Designed classificatory degree

excellent
