

Abstrakt:

The goal of this thesis is to produce a video and a presentation outlining possibilities for leisure-time activities for children and adolescents in Drevcice. As part of the thesis, a draft and a shooting script were created, and then the video was shot based on the script. Pinnacle Studio Ultimate version 14 and Microsoft Office PowerPoint 2007, respectively, were used for this. The theoretical part of the thesis deals with Pinnacle Studio, its development, especially in comparison to other selected editing programs, such as Adobe Premiere and Nero Video. Furthermore, the thesis compares visual presentation techniques with a view to creating PowerPoint presentations. The final part of the thesis describes the practical application of both the video and presentation created.
