

ABSTRACT:

This thesis deals with problems of personal data protection at the schools which provide elementary education (elementary schools, practical elementary schools and special elementary schools) in region Ústí nad Labem. The thesis is divided into three parts: handover of pupils' personal data when they change the school, publication of pupils' work, photos and videorecordings during the school presentation, e.g. at the exhibitions, in school magazine or on the internet and using of camera systems at schools.

The aim of this thesis is to find the optimal and the legal procedure and together with questionnaire survey compare it with real practice at the elementary schools in region of Ústí nad Labem. There were used recommendations, standpoints and interpretations of authorities (Ministry of Education, Regional council, Czech school inspection, Institution for personal data protection) in this thesis.
