

**Abstrakt (anglicky):**

This study focuses on different types of cultural information resources in the Czech Republic, particularly specialized on beaux arts. The topic of the thesis is to describe and essentially analyze libraries, information systems and services in the field of culture within the Czech Republic. The very first chapters of the thesis define the terms such as culture and cultural heritage. The third chapter describes the projects, which fundamentally support culture, cultural heritage and its presentation, preservation etc. In the fourth chapter the main characteristics of the libraries of museums and galleries and general characteristics of libraries, which support culture, are described. The fifth chapter describes libraries whose fund and services are mainly focused on beaux arts. In the last chapter, the informational system and databases of beaux arts are described.
