

The history of everyday life is an interesting historical branch, which brings the researcher a lot of information about family, work, entertainment, problems and other things that surround everyone and every day. In the same way, these things have influenced lives of our ancestors. The fascination with ordinary lives of early modern history is actually a desire to get to know oneself. Despite the fact that the outlook on everyday things may have changed during the centuries, what has not changed were the topics.

The libri testimoniorum are a more than suitable source of information for everyday life research. Owing to the testimonies of the witnesses of the particular trials, the books unwittingly reveal many details about the life of early modern towns. Studies of these books bring motivation for researching not only the everyday history, but also culture and mentality history. Last but not least, it is important to mention research into criminality of early modern towns.
