

The work is devoted to the topic, 'The implementation of cross-cutting theme options RVP environmental education in teaching different subjects'.

The theoretical part aims to clarify the concept of environmental education. There are defined goals of environmental education, its contents and procedures by which the goals are achieved. Furthermore, in the theoretical part describes the challenge of integrating educational content, as my chosen path to implementation of environmental education in elementary schools.

In the practical part of the thesis is first concerned with defining the principles of integrating environmental education into other subjects.

Next, I created a part in the practical methodological material for the implementation of environmental education in teaching various subjects taught in elementary schools. The methodology is complemented with concrete examples of implementation issues of environmental education in the teaching of selected subjects.
