

ABSTRACT

The thesis is about Serbian phraseology, specifically about a survey of knowledge and usage frequency of selected Serbian similes. It provides short summary of phraseographic history and development of phraseology and idiomatics on the territory of Czech Republic, Serbia and Croatia. It also gives theoretical description of phraseology and idiomatics and it focuses in great detail on similes. It deals with survey of knowledge and usage frequency of some Serbian similes based on questionnaires. It dedicates to an external factors that influence knowledge and usage of selected group of similes. A small Serbian-Czech dictionary with phrasemes from the questionnaire is included.

Keywords:

phraseology – similes – Serbian language – questionnaire
