

This Bachelor thesis will endeavour to cover the conception of verbo-nominal constructions and their usage in the language of legal writing. It is divided into two parts: the theoretical one – where the basic terms are defined with a comparative digression on the state of verbo-nominal constructions in the Czech language; and into the practical one – which deals with the analysis of these constructions used in the Italian legal writing, focusing on both gramatical and semantic viewpoint of structures and their Czech equivalents. The Bachelor thesis will include the Italian-Czech terminological dictionary.
