

ABSTRACT

Title: An analysis set plays in defense

Objectives: The aim of this bachelor thesis is the comparison of defense systems, while defending corner kicks. Three most successful teams of World Cup 2010 will be compared.

Hypothesis: I assume that the system of combined defense will be more effective while defending the Corner kicks.

Methods: The method of indirect observation was used to collect and evaluate the data.

Results: The aim of this thesis was accomplished. Defense systems were compared in several categories. The hypothesis was confirmed in particular categories and disproved in others.

Keywords: zone defense, corner kick, free kicks
