

## **Abstract**

This thesis deals with the analysis of patent information, focusing in particular on their use in the business environment. The first part deals with the problems of intellectual property and protection of industrial property rights. A substantial part of the work is devoted to the patent system and its importance for the development of innovative potential of companies and institutions. Another section contains information relating to the patent searching. The final chapters focus on areas of competitive intelligence and especially on the sources of patent information.
