Abstract: The topic of this bachelor thesis is „The possibilities of application of managerial styles in kindergarten“. The theoretical part deals with the difference between managing people and leading people. Next chapter includes managerial styles of work divided according to various authors. Following chapter defines function of manager and analyzes the manager competence. Subsequently there is briefly delineated the situation in the education sector since 1989 and there are also defined current roles of director and deputy director, their rights, responsibilities and obligations. In the empirical part sets problematic issues and describes methods and methodology of research. To achieve the objectives of this thesis was chosen a questionnaire. Based on results of the questionnaire new information about leading styles in kindergarten in Hradec Králové and its surroundings were found. In conclusion all new information were summarized in charts and graphs and evaluated.
