

Abstract

This thesis deals with the issues of upbringing and education out of tuition in Klatovy. The goal of my thesis is to identify the specific activities of each organization for education and upbringing out of tuition in Klatovy, and alternatively to suggest improvements in the work of these organizations.

The work is divided into two parts: the theoretical part explains the history and basic terms in the field of leisure education and puts forward proposals for spending leisure time in different age groups.

The empirical part contains a list of all leisure facilities in Klatovy and semi-structured interviews with representatives of selected organizations for education and upbringing out of tuition. It deals with the methodology of this research.
