

Abstract

In my thesis I will focus on all the successes of Czech and Czechoslovak athletes at the Olympics in the javelin. I also want to briefly describe the history and development of this discipline. Furthermore, I will also describe modern technology of javelin and physiological description. Nevertheless, the main part will be about our Olympic heroes in this technically very demanding discipline. In this part, there will be mainly detailed course of the race at the Olympics, where they have had any success. My thesis will also include a biography of these prominent Athletes.
