

### **Abstrakt v anglickém jazyce :**

The Bachelor Thesis is designed as a one-year visual art project for students in the Art Elementary School between the ages six and thirteen. The theme "Journey on water" portrays a piece of wood from Šumava, floating on the river Vltava in times when wooden rafts were employed. The objective of the project is to reinforce in students a positive attitude to nature and to spark an interest in art and cultural heritage. The structure of the project is based on a story following the piece of wood in different seasons from the river's source to the Prague's historical center. It continues as a subsequent line of open creative visual art projects illustrating the wood's journey to the sea and to the Eastern Island. The entire project culminates in a visit of an exhibition of Jakub Schikaneder and as a collective installation in one of the branches of the Municipal Library "Na Pohorelci" in Prague 1.
