

Abstract:

Topic: Analysis of game in minibasketball from the perspective of interruptions by referees.

Aim: The aim in this bachelor thesis is to make a analysis in one season in minibasketbal games to find out how often and why referees are interrupting the game. Than to make a statistic of all games and compare categories between themselves.

Primary aim is to make the statistic which will show reasons of interrupting and how often they are in game.

Methods: Taking into consideration quantitative survey, my dissertation work was based on methods of secondary information collecting that implies (which means) secondary statistical analysis and observation with taking records down.

Results: In average there are 93, 8 interrupting in game of minibasketbal from referee. Average time of clear game is 20 second. There are differences between categories.

Key words: Basketball, minibasketbal, referee in minibasketbal, types of interrupting game by referee
