Title of the work:	The level o the knowledge of best practices for CPR according to the current Guidelines for nurses working in Jihlava´s hospital
Leader of the work:	Mgr. Ivana Klímová
Number of pages:	120
Number of supplements:	22
Year of apology:	2013
Key words:	CPR, nurse, level of knowledges, Guidelines

The topic of my work is to find out actual knowledge level in CPR, by actually valid guidelines for male and female nurses in Jihlava hospital. Work is divided in two parts, theoretic and empiric.

Theoretic part is shortly focused for history in CPR, later extensively for terminology and whole principles and procedure by guidelines 2010.

In empiric part I deal with research, where I comparing knowledge of selected un-medical healthcare workers within CPR, by individual classes. For epiric part I used questionnaire survey investigation. In finnal discussion I comparing and evaluating determineted goals and hypothesis.

The result of my research can be used as feedback for top management in hospital Jihlava, which yearly preparing CPR training for medical staff.
