Duchovní péče ve třech pražských nemocnicích

Božena Pilnáčková

2013

Abstract

Spiritual care for the sick is not a standard part of all health facilities. The thesis describes the spiritual care in terms of legislation, the history and current practices documented by comparing three Prague hospitals according to certain criteria characterizing provided spiritual care - availability of information of the chaplains work or the offering of other spiritual services, type of work of the chaplains - spiritual activities, interests in the services by the patients, parents and staff, which Churches the chaplains come from, etc.

Keywords

spiritual care in the hospital, spiritual guidance, chaplain
