ABSTRACT:

This thesis deals with the life path of a headmaster of a school. It is based on the legal requirements for the performance of the headmaster and his managerial role required for the management of the school, which he has to manage. It describes an initial period of headmaster's duties and it solves subsequent phases of business. It highlights the influence of the length of time in managing activities in shaping the attitudes and improving the quality of school management. It describes the facts that bring the ever-changing conditions in the educational legislation for the exercise of the headmaster, which significantly affect its access to the profession and life perspective.
