

Abstract

Title: The behaviour of coach – exploring didactic problems

Objectives: The aim of my work is to create a scoping study and the use of feedback information in the training unit.

Research questions:

How should be feedback information mediated to the recipient?

How often and in what forms to use feedback in the training unit?

Methods: In my work I used the method of data acquisition, data analysis method and the method of narrative overview. I have summarized the information and made conclusions.

Results: The goal of this work was completed. The research questions were answered. It was presented instructions for coaches.

Keywords: correction, feedback information, instruction
