Title of diploma thesis: Signs of epilepsy spectrum disorder in a student sample of non-smokers and smokers

The diploma thesis deals with signs of epilepsy spectrum disorder in a student sample of non-smokers and smokers and it continues in thesis of the author M. Světlák and of the author P. Zitová. The diploma thesis is divided into the two main parts – the theoretical part summarized the issue of the temporo–limbic dysfunction, the research part answers the put questions. The main goal of the diploma thesis was to describe the issue of the temporo–limbic dysfunction in the university student sample divided into smokers and non-smokers.
