

## **ABSTRACT**

The bachelor thesis *Vlastní literární tvorba s komentářem* (Author's Literary Work with a Commentary) consists of three main parts.

First, the author presents her own fairytale named *Zvědavé koťátko* (Nosy Kitten) in prose as well as a poetry. The fairytale is aimed at preschool children, first written as prose, later made into a poem.

The second part consists of author's commentary, concerning the creation process of the piece of work. The author informs about the characters of the story, goals of the text, as well as the final touches to the piece of work.

There are three assessments of the work, in the third part of the thesis. There is a literary expert opinion, an opinion of a preschool teacher (a person who knows well the target age-group), and a layman opinion. The final part of the thesis is a reflection on the three opinions mentioned above.
