Pharmacy

Mentor evaluation of diploma thesis

Student: **KOUKOU AIKATERINI**

Mentor of the thesis: Doc. PharmDr. Miloslav Hronek, Ph.D.

Year of the defence: 12015

Title of the thesis:
HUMAN BODY COMPOSITION DURING ONTOGENESIS

The topic of the thesis was chosen from the list of topic of department

Work with literature very good.

Language skills very good.

Student invention excellent.

Student worked independently.

Problems and issues were solved independently with mentor help.

Work in the lab was not available, literature review.

Results interpretation not available, literature review.

Processing of thesis was correct with no corrections.

Graphical processing for the thesis very good.

Mentor comments to thesis and student approach:

The aim of this thesis was bibliographic search related to the human body composition and its changes during ontogenesis. I appreciate independence of students with which to process the whole thesis. From the beginning she used as a source of information professional books for her study of the issue and followed up by searches from journals. Even though it is Greek nationality relatively well managed English language and editing of texts. He worked diligently and was relying on it. Although the work contains some minor bugs, from above I recommend the thesis for defense.

Evaluation of diploma thesis: very good, to defense: recommended

In Hradec Kralove 29.5.2015
