POSTURE UNIVERSAL NURSES AND MIDWIFES AT WHOLELIFE EDUCATION IN FIELD

In the end of the year 2006 I made research at the nurses and midwives in 3 hospitals in Prague. I was interested in your attitude and your interest in your education in branch, in your conditions with study. In the passage teoretical I described the theory of adults education, importance of qualification and the profession competence for a work of the nurses and midwives. I put brain to present systems of lifetime education in the Czech Republic. The final numerical dates showed the high interest in their education. The nurses and midwives to consider your education as a more important they are mostly registered, quiet a few of them dont know the relevance of the word registration. The nurses and midwives are satisfield with this conditions of education. From their employers they would like to grant a fmancial contribution for the seminars and a possibility to educated in your working time.
