

ABSTRACT:

Final thesis deals with one of the managerial competencies of teachers-checking. The essence of control is a critical evaluation of reality with respect to the intended target.

The work is based both on theoretical knowledge gained by studying professional literature, both from some of the experience gained from their own practice, as well as the knowledge that I gained studying school management and in particular the analysis of the information obtained through use of interview techniques, interview related to the findings, in which a variety of professional contexts performing teachers nursery and primary school management activities and monitoring what is normally subject to their control.
