

Legal Regulation of the Use of Genetically Modified Organisms

ABSTRACT

The use of genetically modified organisms on a global scale is on the rise which requires their efficient and consistent regulation. The main goal of the thesis is to provide a comprehensive overview of the legal regulation of genetically modified organisms and their use on several levels. After an introduction to the topic, the thesis deals with the key international documents and then moves on to examining different approaches on the topic and exploring regulation in the United States and in the European Union with a connection the legislation in Czech Republic. In addition, four annexes are included at the end of the thesis for a better illustration of the current use of genetically modified organisms in the world.
