

Subject of this bachelor work are children in difficult situations and in demand of direct help or if you like fund threatend children Kangaroo, witch offer immediate family care solution. Purpose of this work was to find out, who are children who need immediate help. Than evaluate what kind of service kangaroo specify, and what kind of service provide in reality.

The children who fall into kangaroo have in most cases syndrome CAN.

In this case we talking about abuse and neglected children. In next case are children witch for some reason there parents can't take care of them. The legislative framework of this issue is stipulated in section 42 of act 359/1999 collection, on the social protection of children as amended. In particular therein before skilled description segments. I draw from technical literature. In valuation given services I gather mostly from my own experiences in specific kangaroo and materials FOD. In comparison I find out a difference between kangaroo and other foster care institution.

Kangaroo is special in offering fast family care. Children being in a group mostly in four have constantly two „aunts“ taking care of them switching by week witch should simulate family care. However taking into account the capacity of building, kids similar as in other institutions live in band of about 40 children witch is entirely unnaturally surrounding. Likewise in similar institution, also in kangaroo there is no man representative, children are surrounded only by women. To this day there was more than 250 children in kangaroo in Laskova street, and almost 14 % of them spend there more than a year. Can't say it is a short time. In fact there is entire lack of interest to work with families of those children witch I presume that there is lack of interest to return these kids to there own families.
