

This bachelor's thesis called *The Individual Educational Plan for a Child with Intellectual Disability in Preschool Age* deals with different aspects of compiling of an individual educational plan (IEP). At first it compares the development of an intact child with the development of a child with intellectual disability. Farther it introduces the etiology and the grades of intellectual disability and how the intellectual disability affects a developing personality. In the next section the work deals with the principals of stance to a child with intellectual disorder. In the end the work presents the IEP itself, with its contents, its formation, areas of development, it describes the difference between IEP for a child in a special kindergarten and the one for a child in a regular kindergarten.
