

**Abstract:**

In my diploma thesis I would like to discuss palliative (hospice care) in the Czech Republic, development of services and legislation associated with it. Further forms of hospice care services for families and clients. In the next chapter I would like to mention the risks and problems that the employees of hospice care in their work meet. Of this chapter, I followed a question of psychic health workers by employers and other options to avoid the risk factors associated with the exercise of this profession. In the research part, I would like to do qualitative research on the selected device, focusing on problems that are often faced by employees and that the support of the leadership sufficient.
