

Abstract

Medical prescriptions in the Czech Republic

Author: Petra Pečivová

Tutor: RNDr. Jana Kotlářová, Ph.D.

Department of social and Clinical Pharmacy, Faculty of Pharmacy in Hradec Kralove, Charles University in Prague, Czech Republic

Aim of diploma thesis: Was detailed analyze of the medical prescriptions in the Czech Republic, their requirements, and manipulation with that. Prescriptions for medicines (LP) were analyzed in detail, their elements and handling were also described in detail, e-prescription, and current issues were discussed, eg. forgery of prescriptions or cross-border patient pharmaceutical care.

Methods: Legislation of the Czech Republic were the starting basis as at 31 5th 2014 legislation were obtained from the website of the official institutions. From there comes the economic data, augmented by specific examples of smaller public pharmacies. Publications and magazines for pharmacists and health professionals were part of the sources, as well as similar websites. Knowledge at work, including discussion is also based on the author's own experience working in a pharmacy.

Results: Medical prescriptions for medicines were distributed to recipes and order forms, vouchers and orders for medical devices were described only a bit. Each of the prescriptions were explained in detail. Important rules for prescribing LP are set out in legislation. Some of the rules are not just handed down, unrestrained by legislation, and therefore difficult situations arise that do not have strict solution. E-prescriptions were included handling conditions were also included. The economics of prescribing LP was described. The rules for prescribing and dispensing of LP in cross-border healthcare were approached.

Conclusion: Basic materials associated with medical regulations in the Czech Republic have been processed. The provisions prescribing LP was mentioned and discussed. Practical handling of prescriptions, including the current problems associated with it, for example. Fakes, e-prescriptions, drug errors, cross-border care were described and discussed. The thesis serves to streamline the issue of prescriptions and prescribing LP. The work will be

used as part of a larger whole, focusing on the same issues in international comparison.
