

ABSTRAKT

The aim of the thesis was to elaborate the development process of the Častrov comprehensive primary school in the district Pelhřimov based on the school chronicles and refer to the contribution of the acquired knowledge for the schoolwork. The theoretical part is devoted to the study of commemorative books and also in the wider perspective of the whole Pelhřimovsko region. The practical part describes a project carried out with pupils of this school. The purpose was to acquaint the pupils with the history of Častrov school through activation methods and have their impact on the school and the place where they live.
