

## **Abstrakt- anglicky**

The aim is of this thesis called *Changes district Smíchov In 19th and 20th century* is to introduce this Prague municipality mainly during the course of these two centuries, which were very fundamental to its entire history and have even reflected themselves into its present form.

After an introduction to the establishment of Smichov, including the origins of its name and a brief description of its development during the course of history, this dissertation task focuses primarily on Smichov during the 19th century, which is characterized mainly by the process of industrialization. Before outlining and analyzing the most significant business entities operational at that time; in order to maintain a framework for a comprehensive characteristic analysis of Smichov; this written task will also focus on other relevant areas, such as the development of infrastructure, local governance, educational system, social life etc.

The following thesis section presents Smichov in the 20th century, during which its development was influenced mainly by two consecutive world wars and the period of socialism in our country. A very significant reconstruction project of the Andel junction during this century and the beginning of the 21st century is also presented, as well as the current state of Smichov, during which Andel became one of the modern era metropolitan centers, along with the future plans for its further revitalization.

Key words: development, Smichov, industrialization
